

The only one that allows you to save up to 50% of the electricity thanks to the new electronic circuit

**Fresh air
in just a few seconds**

The Turbo-Vent is a ventilation system made from high quality materials, that are shock and UV-ray-resistant. It changes and refreshes the air inside your vehicle within seconds thanks to the 12V DC variable speed motor with 10 blades. It is the only one of its kind with an innovative electronic circuit that allows a rapid, problem-free, change of rotation direction.

The cover is opened and closed manually and the central arm provides stability against strong wind even when travelling with the cover open. Supplied with double external mosquito screen to collect leaves and other debris. New transparent grating that permits maximum air circulation and passage of light. Can be installed on roofs with depths of 3cm to 8.5cm using the optional extension kit.

Turbo-Vent White

03622F01-

Turbo-Vent Crystal

03622F01B

 European Standard

Turbo-Vent silent at high speed and exceptionally silent at the minimum. Without the old resistance systems, which create a lot of heat and consume a lot of energy

Due to the particular aerodynamic shape no spoiler is needed

Maximum stability with the center support adjusting arm

<p>EXTERNAL FIXING</p> 	<p>AIR MAX more silent</p>  <p>31cm + 40%</p>	<p>PERMANENT VENTILATION</p>
