

AQUA® 8

The only one self-priming pump with incorporated filter and anti vibration Silent Kit included

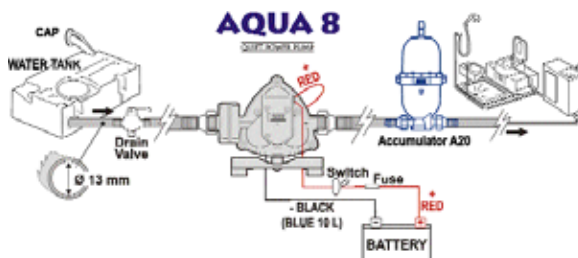

Aqua8: the perfect spare pump interchangeable with all the others

New improved self-priming pump. It will pump water vertically over 3m with no priming. Complete with Silent Kit which eliminates vibrations. The stainless steel filter prevents impurities from entering and is easily cleaned so the pump lasts longer. An automatic pressure switch starts and stops the pump by opening and closing the valve. Non-toxic materials are used for all parts of the pump that come into contact with water. The pump is resistant to limestone deposits and oxidation. Can run dry without damage. The pump can operate in any position, but we recommend installation with the motor on top and the head underneath to prevent possible damage to motor caused by leaks. Install on a solid surface to reduce noise and vibrations. Easy maintenance: all its components are easily replaced. New improved base plate with sound-absorbing feet that can be interchanged with previous pump models. Angle and straight connectors for Ø 13mm pipes standard delivered.

Italian Patent: 1221254 - German Utility Model 201 09 722.2

AQUA 8: The intelligent pump that consumes the half of the others. Best price and best quality guarantee.
