

More living space to your holiday with the essential Privacy[®] Room

The two side windows can be opened and come with mosquito screens.

All windows are standard delivered with curtains.

Standard delivered with Clip System bars with interior adjustment.

The door can be placed in the left-hand side.....

Easy to install

Doubles your living space

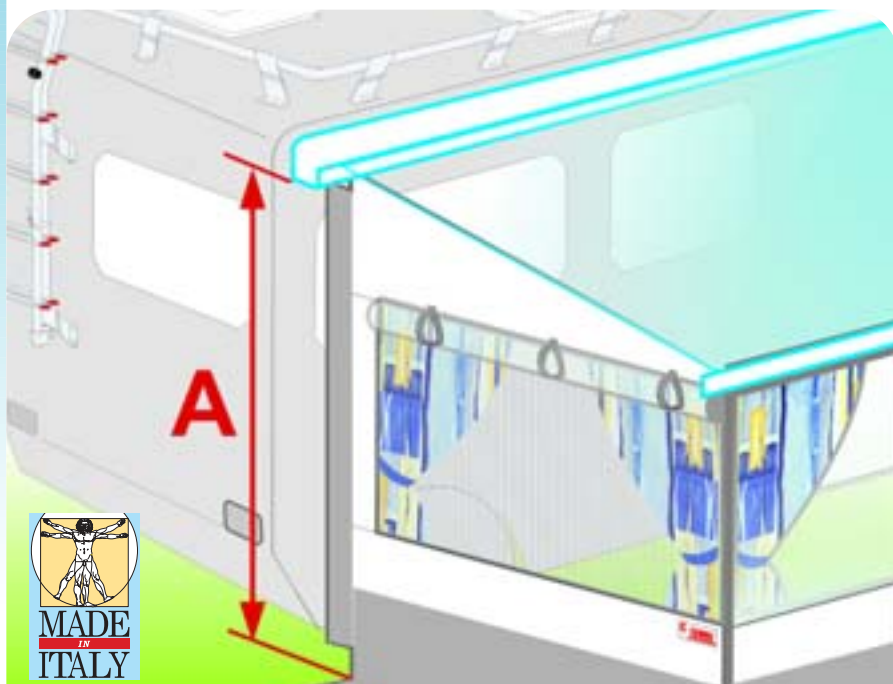

With the Privacy Room you can transform your Fiammastor into a comfortable living area. The side panels are quickly put together with the exclusive patented Clip System. The upper part is fastened together with the lower part, the fabric of the awning is then blocked between the lower and upper rail by screwing the knob. No other fixing system is as stable as the Fiamma Clip System. A special sponge is fitted, vertically, on the back part of the side panels and is fixed against the vehicle by an aluminium telescopic pole (included).

The front panel is inserted in the front rail of the awning and with the YKK zip it is joined with the side panels.

Standard delivered with: Front panel with window and independent door that can be moved onto the right-hand or left-hand side. 2 side panels, windows with mosquito net. The windows can be rolled up. Clip System installation system (p. 24), Curtains Kit Oslo, Mega Bag (p.31).

...and easily moved on to the right hand side!

Your Privacy with great ventilation

The Fiamma Privacy is the best on the market because is provided with complete ventilation from the side windows.

Have fun in open air in your own Privacy. Roll up the side curtains to let fresh air in.

The mosquito net will keep out all insects.

The two side windows can be opened and come with mosquito screens.

***F45 Plus and F45 Plus L:**
 for both models it is necessary to shorten the Clip-System by carefully following the instructions. Shorten side panels by just rolling-up the sponge.

Privacy Room

Exclusive to Fiamma

The patented CLIP SYSTEM®, standard delivered, offers better protection against rain and draught. Improved fastening system **with adjustment set inside the Privacy** for more comfort and safety.

The Privacy-Room can be modified

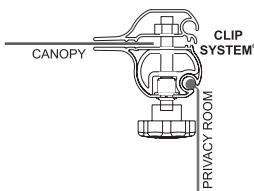

The exclusive **Clip System Fiamma** enables a quicker installation, as it only comes in two pieces. Double profile in solid anodized aluminium allows a secure blocking of the canopy (picture 3).

Vertical padding: enables better closure, eliminates draught in vehicles with shaped walls (picture 4).

The perfect solution for your Privacy enclosure!

The Clip System weighs less: easier to install and carry.

New and improved Clip System with fastening from the inside.

The Kit Privacy O allows the installation of the Privacy[®] Room on Omnistor 5002 awnings. It is standard delivered with the Privacy Room.

Optional skirting

Exclusive to FIAMMA

With the new Clip system the side panels of the Privacy are quickly and easily joined with the fabric of the awning. Just insert the side panels into the rail of the clip system (photo 1, page 24), place the clip system in the corner of the casebox (photo 2) and the leg support of the front panel. Then the upper part is fastened together with the lower part (photo 3). In order to guarantee a perfect seal the fabric of the awning is blocked between the lower and upper rail by screwing the internal knobs. The front panel of the Privacy Room is inserted into the rail of the front of the awning (photo 5) and with the YKK zip it is then joined with the side panel of the Privacy (photo 6). The clip system is also delivered with two vertical rafters that are fixed between the side walls and the vehicle walls and the side sponges (photo 4). The new patented system uses the sandwich technology and is made of anodized aluminium. It is adaptable for awnings with a maximum extension of 250cm (could be compatible with awnings of shorter extension, for example F45 plus with extension 225 cm or the awnings of Omnistor 5002). The clip system is standard delivered with the Privacy Rooms; it is however possible to buy it separately in order to use it on Privacy Rooms produced after 2005.
