

Easy to install

More living space to your holiday with the essential Privacy® Room

Doubles your living space. The Fiamma Privacy Room is the best on the market because it grants the complete aeration with side windows.

With the Privacy Room you can transform your Fiammastor into a comfortable living area. The side panels are quickly put together with the exclusive patented Clip System. The upper part is fastened together with the lower part, the fabric of the awning is then blocked between the lower and upper rail by screwing the knob. No other fixing system is as stable as the Fiamma Clip System. A special sponge is fitted, vertically, on the back part of the side panels and is fixed against the vehicle by an aluminium telescopic pole (included). The front panel is inserted in the front rail of the awning and with the YKK zip it is joined with the side panels. Standard delivered with: Front panel with window and independent door that can be moved onto the right-hand or left-hand side. 2 side panels, windows with mosquito net. The windows can be rolled up. Clip System installation system (p.31), Curtains Kit London, Mega Bag (p.46).

The two side windows can be opened and come with mosquito screens.

All windows are standard delivered with curtains.

The Kit Privacy O allows the installation of the Privacy® Room on Omnistor 5002 awnings. It is standard delivered with the Privacy Room.

Standard delivered with Clip System bars with interior adjustment.

The door can be placed in the left-hand side.....

....and easily moved on to the right hand side!

Curtains Kit London, standard delivered

Curtains Kit Oslo, optional

► The two side windows can be opened and come with mosquito screens.

CLIP SYSTEM

Exclusive to FIAMMA

With the new Clip system the side panels of the Privacy are quickly and easily joined with the fabric of the awning.

Just place the clip system in the corner of the casebox and the leg support of the front panel.

Then the upper part is fastened together with the lower part.

In order to guarantee a perfect seal the fabric of the awning is blocked between the lower and upper rail by screwing the internal knobs.

Insert the side panels into the rail of the clip system.

The front panel of the Privacy Room is inserted into the rail of the front of the awning and with the YKK zip it is then joined with the side panel of the Privacy.

The clip system is also delivered with two vertical rafters that are fixed between the side walls and the vehicle walls and the side sponges.

The new patented system uses the sandwich technology and is made of anodized aluminium. It is adaptable for awnings with a maximum extension of 250cm.

(when closed the set of tent pegs takes up only 120 cm). The clip system is standard delivered with the Privacy Rooms; it is however possible to buy it separately in order to use it on Privacy Rooms produced after 2005.

The Clip System weights less: easier to install and carry.
