*All the Fiammastor canopies are sealed by ultrasound for a perfect resistance to water.*

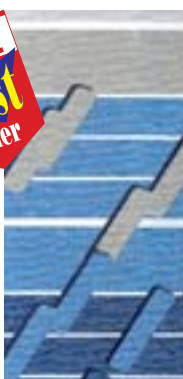

*All canopies are printed on both sides. The outer layer is hyperprotected to allow complete and easy deep cleaning.*

**The classic multicoloured canopies without seams**

The Fiammastor® canopy fabric guarantees higher resistance to UV rays. It does not fade and is hermetically sealed by ultrasound. The absence of the seams allows the hermetic resistance to water and to tears. It is flame-retardant, can be rewound when damp, is light-resistant, rot-proof, waterproof and washable.

**The canopy made with two pieces of Fiammastor is of an excellent quality, sturdy and strong.**

The manufacture of Fiammastor canopy with two pieces sealed by ultrasound is better than a fabric with one piece. The two parts allow to have different kind of fabrics, the upper part can be more resistant to the bad weather and anti-tear. The central sealed increase the solidity and the tension of the fabric, granting a perfect closure of the awning in the time. For this reason all the Fiammastors are manufactured with two pieces, sealed by ultrasound, in order to grant a high quality product also in the elegant wave version, completely coloured.
