

# KATHREIN CAP 900

The reception areas shown here are based on the official footprints supplied by the satellite operators, results gained by testing the equipment ourselves and reports from other users. They should be used as a guide only as a satellite's footprint can change at any time and without warning.

**ASTRA 2D.** Channels include: BBC TV 1, 2, 3,4, News 24, ITV 1, 2, 3, 4, Men & Motors, Film 4 & some radio stations. Also some SKY subscription channels inc. SKY Box Office. In fringe areas, some channels are easier to receive than others. For example if BBC 1 (London) or ITV (Central) are not available, try BBC 1 (Scotland) or ITV (south-west). Astra 2D channels can be received in the coloured area of SW Spain and Portugal. However, reception is variable and cannot be guaranteed. Some regional BBC & ITV channels are easier to receive than others.

**ASTRA 2 SOUTH.** Channels include: SKY News, CNN, BBC radios 1, 2, 3, 4 S4C, and many SKY subscription channels including some SKY Sports, Bravo, Discovery, National Geographic and some UKTV channels

**ASTRA 2 NORTH.** Channels include: Channel 4, Community Channel and SKY subscription channels including SKY Box Office, some UKTV channels, some SKY Sports and SKY 1, 2 & 3. Channel 4 can also be receive in some parts of the shaded area in SW Spain & Portugal. However, reception is very variable.

**ASTRA 2C.** Channels include: Five, Five US, Five Life  
The Astra 2C footprint is similar to the Astra 2 south and Astra 2 north footprints combined.

**EUROBIRD 1.** Channels include: Movies4Men, TrueMovies, Red, Zone channels, Performance, The Vault (and many other music channels), Information TV, Horse & Country, Bloomberg, France 24, Russia Today, some SKY Box Office and a lot of radio stations. Some channels have a much stronger signal than others and so the channels available will vary greatly according to your position within the footprint.
