

OMNISTOR•6502 & 6802

Installation on the roof

Extra large sizes

For caravans and motorhomes

6802 with velcro

The Omnistor 6502 is the only awning for roof installation with a length up till 5,50m. Also suitable for bigger vehicles. The Omnistor 6802 has an extra large projection of 2,75m, from 4m length upwards.

• **Operation** The awning is very easy to operate. The advantages are the user-friendly telescopic hand crank (up to 190cm!), the built-in end stroke that ensures that the fabric cannot be rolled up incorrectly and the well-known Quick Lock System for easy adjustment of the support arms.

• **Construction** The retractable arms have twin cables for increased fabric tension. Automatic locking of the front profile prevents the awning from opening whilst driving.

• **Installation** Depending on the type of vehicle you have, there is a choice of two installation methods, see page 14. See page 27 for adapters.

Installation kits always need to be ordered separately!

• **Comfort** Two clips are supplied as standard for storing the hand crank. The 6502 can be extended with a Safari-Room with clips (3), the 6802 with a Safari-Room 6802, with velcro (4). The support arms can be installed to the vehicle wall by using the mounting brackets supplied or to the ground.

• **Extra** A built-in 12V motor with emergency operation is available (5).
The motor cannot be installed retrospectively on a manual awning!

• **Colours**

03 >	Blue Sky	04 >	Alaska Grey
18 >	Bahamas Turquoise	20 >	Miami Grey
22 >	Ral 9002	21 >	Orlando
27 >	Curaçao Blue
