

# OMNISTOR•9005 *by Carefree*

For residential caravan

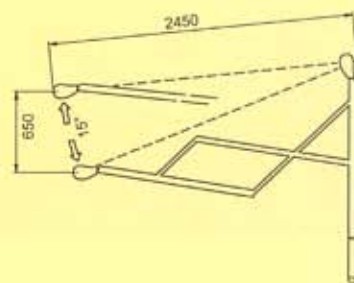

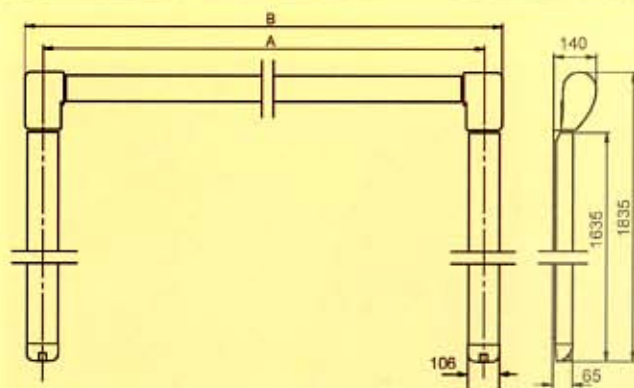

No support arms located on the ground

Very sturdy

With 12Volt motor

The Omnistor 9005 is a very modern, sturdy and easy-to-use awning with integrated 12V motor that is suitable for class-A motorhomes or residential vehicles.

- **Operation** You can adjust the angle of inclination of both arms separately over six different positions. With this feature you can achieve the perfect shade area (2).
- **Construction** Two rigid pitch arms deploy a stable, truss-like, overhead support and keep the awning stable in breezy conditions. Gas struts on both arms assure a tight fabric.  
The 12V motor is built into the side cap of the front profile (1).
- **Comfort** There's no need to level the awning before you roll it up again. The Omnistor 9005 will self-level for you and it will roll back out to your last setting!

art.nr.	LENGTH	A/B (mm)	WEIGHT
090400**	4,00 m	3983/4089	39,50 kg
