

OMNISTOR•5102

Exclusively for the Volkswagen

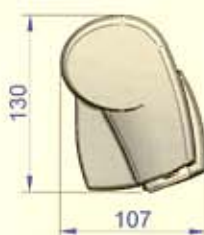

T5 Multivan and Transporter

Ultra rapid gear

Exclusive design

Exclusively for the Volkswagen T5 Multivan and Transporter, we have developed the Omnistor 5102, a compact and modern awning that completes the appearance of your vehicle.

- **Operation** The 5102 has an ultra rapid gear that is operated with a hand crank of 90 cm (1). The end stroke system avoids rewinding the fabric in the wrong way and the height of the support arms can be easily adjusted with the Quick Lock system.
- **Installation** With the help of the two **supplied adapters**, it is possible to install the awning onto the roof rail that is standard on the T5 Multivan (2). **Please note:** This rail is optional on the Transporter. For further information, please contact your Volkswagen dealer.
- **Remark!** Installation with other adapters is not possible. The 5102 is not suitable for the VW California. Special awning for VW California: available exclusively from your VW dealer!
Installation on **right hand drive** vehicle **not possible!**
- **Special** The aluminium awning box is light grey (RAL 9006) powder coated.
