

OMNI•BIKE deluxe

Extra stability due to the oval frame

Wheel fixation also for children's bikes

Fully equipped

Easily extendable

The Omni-Bike deluxe series consists of two high quality bike carriers for two bikes fully equipped. The basic models for two bikes can be extended for 3 or 4 bikes.

- **Construction** The tubular frame with a width of 42mm is made of anodised aluminium and has an oval shape for more stability (1). **The tube of the carrier frame is extra thick and therefore almost twice as solid.** Because of this extreme stability the carriers can both be extended to a carrier for 3 or 4 bikes. **No need to adjust the carrier support!** The height can be adjusted till 1,50m (not for the Short Version model).
- **Installation** The frame is installed into two suspension hooks and a right angle profile so that the pressure on the vehicle wall is evenly divided.
- **Comfort** The special rails of this bike rack are equipped with easy Quickblockers for comfortable and safe wheel clamping (3). The Quickblockers can be moved over the full length of the rail and can hold any type of bike! **Comes in very handy when loading the children's bikes!**
There is one bike holder for each bike rail (2). A rack holder is fixed to the outer rail and can be moved (4). Close the bike rack, move the rack holder and you're ready to go! Plastic covers ensure an aesthetic finish both inside and out.
- **Extra** Blocking hooks for fixation to premounted fixation hooks are supplied as standard! (5).
- **Remark!** For a mounting height smaller than 106cm the upper arms can be cut down.

EXTENSION SET 3 BIKES

= 1 extra rail + 1 bike holder: **art.nr. 18050900**

EXTENSION SET 4 BIKES

= 2 extra rails + 2 bike holders: **art.nr. 18051000**
