

TOP•BOX

Very strong ABS plus with UV-protection layer

Gas springs to keep the cover open

Very stable due to the aluminium inner frame

Locks ensure a high level of security

The spacious white roof boxes in the Top-Box series have been for many years now the eye catchers of the European highways and campsites. They are the classics in the camping sector!

- **Operation** The box is easy to open and close with the integrated handle (1). Watertight security lock with key and hinges made of rustproof steel (2).
- **Construction** The boxes are made of ABS-PLUS material which is resistant to shocks and weather conditions. Co-extruded with an ultraviolet protection layer to prevent quality degradation during the process of ageing. Reinforced with aluminium inner frame with waterproof rubber foam band.
- **Installation** Easy installation with the standard installation kit for Top-Box (3).
- **Comfort** The boxes are equipped with one or two gas springs (4).
