

# Share our passion

Thule is the world leader in transport accessories. We provide transport solutions for active families, professionals, and wildlife lovers who want to transport their material safely, simply, and in style.

We develop and produce privatised all-carrier systems and accessories for caravans and motorhomes, trailers, towing vehicles and organise solutions and snow chains for consumers and the commercial market. Moreover, we are also a leader in all these product segments.

## Fairs

You can also visit the Omnistor stand at various international exhibitions in Europe. This will give you the opportunity to see our classic and recent products and our staff will be delighted to give you more information and answer any questions. Moreover, there is always something nice ready for you.

Here is a list of the exhibitions where you can find us:

- Caravan Salon, Messe Düsseldorf, Germany
- Salon des Véhicules de Loisirs, Le Bourget Paris, France
- International Caravan & Motorhome Show, NEC Birmingham, UK
- Kampeer en Caravan Jaarbeurs Utrecht, The Netherlands
- Suisse Caravan Salon, Bern, Switzerland

The promobil 'Best Brand awards' confirm the Thule|Omnistor market position in the business of accessories for recreational vehicles.

You can find out more about  
Thule|Omnistor products on  
the web site [www.omnistor.com](http://www.omnistor.com).

The web site gives you a lot more information about our range of products. You will find assembly and usage instructions and you can look for parts. If you want to know who is your nearest local dealer, the web site is the best place to find out.

On [thule.com](http://thule.com) we also present a wide range of all other transport possibilities, such as safety, comfort, and style.

Thule nv is not responsible for any misprints. There may be local variations in the assortment of products and products may be changed without prior notice. We do not accept responsibility for any possible errors in the content of the catalogue. Colours and samples may vary from standard colours as a result of the printing process.
