

# Quality labels

## DOUBLE SECURITY LOCK

Due to the security locks on both ends of the awning the front profile cannot open whilst driving. The locks automatically open when cranking out the awning.

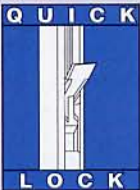

## HIGHLY WIND RESISTANT

Double fabric tension  
Two rigid retractable arms (53mm high) with twin cables that can take twice as much pressure as the traditional arms (32kg instead of 16kg)

## QUICK LOCK SYSTEM

The support arms are easily released from the front profile. The "Quick Lock" system ensures the height of the support arms is adjusted swiftly and easily. A steel spring makes sure the arms are blocked.

## OMNISTOR EXTRA LARGE

The solid construction creates the possibility of making awnings with projections of 2.50m and even up to 2.75m.

## COATING QUALITY

1. Topcoat of the PVC fabric, resisting scratching and fading.
2. Vinyl with painted pattern.
3. High strength polyester scrim.
4. Vinyl with painted pattern.
5. Topcoat of the PVC fabric, resisting scratching and fading.
