

# OMNISTOR•5002

## With ultra fast gear!

The Omnistor 5002 fits elegantly within the current design of motorhomes due to its smaller end caps and modern design! This awning has all the excellent features of an Omnistor awning and presents a modern and elegant appearance!

**Operation:** The major advantages are: an ultra flexible gear (one third less rotations), a built-in end stroke which ensures that the fabric cannot be rolled up incorrectly and the well known Quick Lock System for easy adjustment of the support arms.

**Construction:** The retractable arms have twin cables for maximum fabric tension and the redesigned front profile ensures perfect closing every time. A double security lock on both sides of the front profile avoids the unwanted opening of the awning whilst travelling. The roller tube has a 48mm diameter.

**Comfort:** Two clips for storing the hand crank are supplied as standard! Also supplied as standard are items for the installation of a Safari-Room by means of clips. The support arms can be installed to the vehicle wall by using the mounting brackets supplied or to the ground.

Tip: Use a sealing rubber when mounting the awning with the flat adapters, to prevent water from penetrating between the vehicle and the awning. (see p.24)
