

OMNISTOR•5500 & 5800

Extra long or extra wide

Both the Omnistor 5500 and 5800 have a new finish with a flat front profile. The Omnistor 5500 is available up till 6m length and fits perfectly to larger vehicles. The Omnistor 5800 has a 2,75m projection from lengths upwards of 4m. For lengths of 3,00m and 3,50m the projection is 2,50m. The installation is carried out in exactly the same way as the Omnistor 5002.

Operation: The operation is extremely easy. The advantages are the built-in end stroke that ensures it is impossible to roll up the fabric in the wrong way and the well-known Quick Lock System for easy adjustment of the support arms.

Construction: The retractable arms have twin cables for maximum fabric tension. The double security lock on both sides of the awning avoids the opening of the awning whilst travelling.

Comfort: Two clips for storing the hand crank are supplied as standard. The 5500 can be extended with a Safari-Room, the 5800 with a Safari-Room 5800 (see next page). The support arms can be installed to the vehicle wall by using the mounting brackets supplied or to the ground.

Both awnings are now available with a built-in 12V motor with emergency operation. All motors have to be factory fitted. It is not possible to install a motor after production.

Motor 12 Volt
