

OMNISTOR•6002

Motor 12 Volt

For every roof type!

The Omnistor 6002 is an awning with retractable arms that can easily be mounted on the roof of a caravan or a camper.

Operation: The awning is very easy to operate. The advantages are the built-in end stroke that ensures that the fabric cannot be rolled up incorrectly and the well-known Quick Lock System for easy adjustment of the support arms.

Construction: The retractable arms have twin cables for increased fabric tension. Automatic locking of the front profile prevents the awning from opening whilst driving.

Comfort: Two clips are supplied as standard for storing the hand crank. Also supplied as standard are items for the installation of a Safari-Room by means of clips.

Remark: The option of a 12V motor for the awning is not available unless ordered originally. The awning is 15cm longer with motor.

The support arms can be installed to the vehicle wall by using the mounting brackets supplied or to the ground.

Installation: Depending on the type of vehicle you have, there is a choice of two installation methods. **Installation kits always need to be ordered separately!**
