

OMNISTOR•1000

& CARAVAN

Omnistor Caravan

Compact and easy to use!

The Omnistor 1000 and the Omnistor Caravan are the best awnings for caravans and smaller vehicles.

Operation: Both awnings are operated by hand. The support arms are equipped with the well-known Quick Lock System.

Construction: The fabric, tension rafters and support arms are rolled up in one package. The tension rafters and support arms are stored in the front profile and can easily be released.

The Omnistor 1000 has a compact aluminium housing with security lock.

For the Omnistor Caravan all parts are stored in a PVC cover that can be slid easily into the caravan rail by means of a joint.

Comfort: Your awning can be set up in seconds. The support arms can be installed to the vehicle wall or to the ground.

Remark: You can't mount a Safari-Room to an Omnistor Caravan but a Rain-Blocker side with a 2,00 or 2,30m projection can be installed to this awning (see page 24).

Remark: No supplementary rafter can be used!
