Cassette roll out awning for window

The Omnistor W-150 is suitable for both caravans and motorhome. The box colour is alpine white. In the rolled up position the awning is automatically closed.

Operation: The awning is manually operated.

Comfort: The awning can be combined with a W-150 bike carrier, which is also installed in the caravan rail. The bike rack remains in place when the awning is opened. (see page 35 for the W-150 bike rack.)

Installation: Installation is carried out by using the supplied adapters onto the existing awning rail or by using the rail supplied.

The W-150 is available in all PVC fabric colours (see page 485) and in see-through screen fabric (colour 13) that filters the sunlight.
