

OMNI•BIKE deluxe

www.motorcaravanning.co.uk

Extra stability through the rails equipped with Quickblockers ensuring the safe locking of the wheels. The Quickblockers can be moved over the full length of the rail and can hold any type of bike! Comes in very handy when fixing the children's bikes!

Extendable bike carrier models

The Omni-Bike deluxe series consists of two high quality bikecarriers for 2 bikes fully equipped. The carriers can both be extended to a carrier for 3 or 4 bikes.

Construction: The tubular frame with a height of 42mm is made of anodised aluminium and has an oval shape for more stability. Because of this extreme stability the carriers can both be extended to a carrier for 3 or 4 bikes. No need to adjust the carrier support!

The height can be adjusted till 1,50m (not for the Short Version model). All fixation materials are rustproof!

Comfort: The special rails of this bike rack are equipped with easy Quickblockers for comfortable and safe wheel clamping. One bike holder for each bike rail and plastic covers for an aesthetic finish both inside and out. New! Blocking hooks for fixation to premounted fixation hooks are now supplied as standard!

Installation: The frame is installed into two suspension hooks and a corner profile so that the pressure on the vehicle wall is evenly divided.
